

Electricity and boiler switch (Ruhsitzstrasse 22, 1st floor Ost)

Should you find yourself not having enough hot water then there is a switch in which you can flip. By flipping this switch the water will heat up again for you. Please note it takes some time. You will find the switch to heat up the water downstairs in the basement. Flip the switch to I.

Should you experience a black out in your apartment then you will also find the flip switch downstairs. By flipping the switch back up your electricity will return back to normal. All the switches should be turned up. As in the photo shown below.
